Reasons for Allowance

1. Claims 1, 4-11, 14-21, and 24-29 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior arts of record teaches and discloses a system and method for processing custom tags in a document object model (DOM) wherein a document object model tree is processed to identify custom tags. Upon receiving a custom tag, an appropriate tag handler for processing. However, the invention has some particular combination limitations that are different and distinct from prior arts (see applicant's remarks filed on December 27, 2005 which points out the reason claims are distinguishable and patentable over the prior art of record). Among the differences between claimed invention and the prior art of record, the major difference is the combination of a method and system for transforming custom content generation tags including a web server receives a request from a web browser, the request identifying a file comprising one or more standard content generation tags and custom content generation tags, both of which the web browser is unable to interpret; a web page processing engine operable to receive the standard content generation tags and the custom content generation tags and to transform the standard content generation tags into a first output that the web browser is able to interpret, the web page processing engine is unable to interpret the custom content generation tags; the web page processing engine communicates the first output and the custom content generation tags to the web server; a transformation engine operable to receive the custom content generation tags, transforms the custom content generation tags into second output that the web browser is able to interpret and

communicates the second output to the web server and the web server further operable to receive the second output and communicate the first and second output to the web browser in response to the request are novel, thus the invention is patentable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
